About HAYSTACK PROJECT and RCPC

Haystack Project is a 501(c)(3) whose core mission is to evolve health care payment and delivery systems to spur innovation and improve quality in care toward effective, accessible treatment options for rare and ultra-rare patients.

The Rare Cancer Policy Coalition (RCPC) is a Haystack Project initiative that brings together rare cancer patient organizations to focus specifically on systemic reimbursement barriers and emerging landscape changes that impact new product development and treatment access for rare cancer patients.

We strive to amplify the patient and caregiver voice in disease states where unmet need is high and treatment delays and inadequacies can be catastrophic.
